

TO WHOM IT MAY CONCERN

We would like to request that the FCC look at the wishes of the Indiana residence when the hearing on Docket 02-278 when it comes up for a hearing.

The residence clearly indicated by registering with the State Government and the Federal DO NOT CALL LIST that they wished to have the calls to their homes stopped. If I have business with a company it is my duty to call them if I have a question or have business with them. If I am working on bank paperwork then they have a right to call to gather any information needed to process that information for loan, or such....**but they do not have the right to call me to solicit more business.**

We have a right to our privacy and want the FCC to help insure that it remains that way.

We have also attached a note on the current issues concerning cell phones and the rights we have concerning the DO NOT CALL LIST to cover these phones as well

Thank you for your help in protecting my rights.
